

Airplane Flying Handbook (FAA-H-8083-3C)

Acknowledgments

The Airplane Flying Handbook was produced by the Federal Aviation Administration (FAA). The FAA wishes to acknowledge the following contributors:

Mr. Shane Torgerson for imagery of the Sedona Airport (Chapter 1)

Mr. Robert Frola for imagery of an Evektor-Aerotechnik EV-97 SportStar Max (Chapter 16)

Additional appreciation is extended to the General Aviation Joint Steering Committee (GA JSC) and the Aviation Rulemaking Advisory Committee's (ARAC) Airman Certification Standards (ACS) Working Group for their technical support and input.

Airplane Flying Handbook (FAA-H-8083-3C)

Major Revisions

- Removed mandatory language or cited applicable regulations throughout handbook.
- Chapter 1 (Introduction to Flight Training) – Added information on the FAA Wings Program.
- Chapter 2 (Ground Operations) – Added a new graphic and information regarding detonation. Now uses the same marshalling graphic as the AMT General Handbook. Updated material on hand propping to match the material in the AMT General Handbook (it doesn't matter whether a pilot or mechanic is hand propping).
- Chapter 3 (Basic Flight Maneuvers) – Corrected G1000 and indications of slip and skid graphics.
- Chapter 4 (Energy Management) – All new chapter/material. Incremented the existing chapters 4-17 by 1 (now there are 18 chapters in total).
- Chapter 5 (Maintaining Aircraft Control) – Revised the order in which the material was presented.
- Chapter 7 (Ground Reference Maneuvers) – Corrected errors in text and graphics for eights on pylons.
- Chapter 9 (Approaches and Landings) – Added information concerning a forward slip to a landing and corrected Figure 9-6. Changed description associated with Crosswind Final Approach. Removed material on 360 degree power-off landing as this maneuver is not part of testing standard.
- Chapter 10 (Performance Maneuvers) – Added information on lazy eights.
- Chapter 11 (Night Operations) – Revised to align with material from CAMI.
- Chapter 13 (Transition to Multiengine Airplanes) – Incorporated the addendum. Corrected G1000 displays and force vectors on figures. Accelerated approach to stall minimum altitude revised to match the ACS. The 14 CFR part 23 certification standard used for many multiengine airplanes is now referred to a historical standard, since many of the previous requirements will not apply to newly certificated aircraft.
- Chapter 14 (Transition to Tailwheel Airplanes) – Made minor revision regarding handling characteristics.
- Chapter 15 (Transition to Turbopropeller-Powered Airplanes) – Addressed an NTSB recommendation regarding slow spool up time of split-shaft engines and corrected figure of fixed-shaft engine gauges.
- Chapter 16 (Transition to Jet-Powered Airplanes) – Removed extra information that appears unrelated to flying a turbojet and added information regarding energy management and distance versus altitude in a descent.
- Chapter 18 (Emergency Procedures) – Revised information regarding the safety of turning back after an engine failure after takeoff. Added a section on emergency response systems to include ballistic parachutes and autoland systems. Corrected figures of G1000 displays.

Airplane Flying Handbook (FAA-H-8083-3C)

Table of Contents

Chapter 1: Introduction to Flight Training

Introduction	1-1
Role of the FAA	1-2
Flight Standards Service	1-5
Role of the Pilot Examiner	1-6
Role of the Flight Instructor	1-6
Sources of Flight Training	1-8
Airman Certification Standards (ACS) and Practical Test Standards (PTS)	1-9
Safety Considerations	1-10
Collision Avoidance	1-10
Runway Incursion Avoidance	1-12
Stall Awareness	1-13
Use of Checklists	1-15
Continuing Education	1-16
FAA Wings Program	1-16
Chapter Summary	1-16

Chapter 2: Ground Operations

Introduction	2-1
Preflight Assessment of the Aircraft	2-1
Visual Preflight Assessment	2-4
Outer Wing Surfaces and Tail Section	2-6
Fuel and Oil	2-7
Landing Gear, Tires, and Brakes	2-10
Engine and Propeller	2-11
Risk and Resource Management	2-12
Risk Management	2-12
Identifying the Hazard	2-12
Risk	2-13
Risk Assessment	2-13
Risk Identification	2-13
Risk Mitigation	2-13
Resource Management	2-13
Situational Awareness	2-13
Human Resource Management	2-13
Task Management	2-14
Aeronautical Decision-Making (ADM)	2-14
Ground Operations	2-14
Engine Starting	2-16
Hand Propping	2-16
Taxiing	2-18
Before Takeoff Check	2-21
Takeoff Checks	2-22
After Landing	2-22
