

This problem was compounded by the security statements signed by each volunteer before he participated in the testing. As part of this statement, potential subjects agreed that they would:

... not divulge or make available any information related to U.S. Army Intelligence Center interest or participation in the Department of the Army Medical Research Volunteer Program to any individual, nation, organization, business, association, or other group or entity, not officially authorized to receive such information.

I understand that any action contrary to the provisions of this statement will render me liable to punishment under the provisions of the Uniform Code of Military Justice.¹¹⁹

Under these provisions, a volunteer experiencing aftereffects of the test might have been unable to seek immediate medical assistance.

This disregard for the well-being of subjects drug testing is inexcusable. Further, the absence of any comprehensive long-term medical assistance for the subjects of these experiments is not only unscientific; it is also unprofessional.

4. Lack of Normal Authorization and Supervision

It is apparent from documents supplied to the Committee that the Army's testing programs often operated under informal and nonroutine authorization. Potentially dangerous operations such as these testing programs are the very projects which ought to be subject to the closest internal scrutiny at the highest levels of the military command structure. There are numerous examples of inadequate review, partial consideration, and incomplete approval in the administration of these programs.

When the first Army program to use LSD on American soldiers in "field stations" was authorized in May 1955, the Army violated its own procedures in obtaining approval. Under Army Chief of Staff Memorandum 385, such proposals were to be personally approved by the Secretary of the Army. Although the plan was submitted to him on April 26, 1956, the Secretary issued no written authorization for the project, and there is no evidence that he either reviewed or approved the plan. Less than a month later, the Army Chief of Staff issued a memorandum authorizing the tests.¹²⁰

Subsequent testing of LSD under Material Testing Program EA 1729 operated generally under this authorization. When the plans for this testing were originally discussed in early 1958 by officials of the Army Intelligence Center at Fort Holabird and representatives of the Chemical Warfare Center at Edgewood Arsenal, an informal proposal was formulated. This proposal was submitted to the Medical Research Directorate at Edgewood by the President of the Army Intelligence Board on June 3, 1958. There is no evidence that the plan was approved at any level higher than the President of the Intelligence Board or the Commanding General of Edgewood. The approval at Edgewood appears to have been issued by the Commander's Adjutant. The Medical Research Laboratories did not submit the plan to the Surgeon General for approval (a standard procedure) because

¹¹⁹ Sample Volunteer Security Statement.

¹²⁰ Inspector General of the Army Report, "Use of Volunteers in Chemical Agent Research," 3/10/76, p. 109.

the new program was ostensibly covered by the authorizations granted in May 1956.¹²¹

The two projects involving the operational use of LSD (THIRD CHANCE and DERBY HAT) were apparently approved by the Army Assistant Chief of Staff for Intelligence (General Willems) on December 7, 1960.¹²² This verbal approval came in the course of a briefing on previous drug programs and on the planned field experimentation. There is no record of written approval being issued by the ACSI to authorize these specific projects until January 1961, and there is no record of any specific knowledge or approval by the Secretary of the Army.

On February 4, 1963, Major General C. F. Leonard, Army ACSI, forwarded a copy of the THIRD CHANCE Trip Report to Army Chief of Staff, General Earl Wheeler.¹²³ Wheeler had apparently requested a copy on February 2. The report was routed through a General Hamlett. While this report included background on the origins of the LSD tests, it appears that General Wheeler may only have read the conclusion and recommendations.¹²⁴ The office memorandum accompanying the Trip Report bears Wheeler's initials.¹²⁵

5. Termination of Testing

On April 10, 1963, a briefing was held in the ACSI's office on the results of Projects THIRD CHANCE and DERBY HAT. Both SPT's concluded that more field testing was required before LSD could be utilized as an integral aid to counterintelligence interrogations. During the presentation of the DERBY HAT results, General Leonard (Deputy ACSI) directed that no further field testing be undertaken.¹²⁶ After this meeting the ACSI sent a letter to the Commanding General of the Army Combat Developments Command (CDC) requesting that he review THIRD CHANCE and DERBY HAT and "make a net evaluation concerning the adoption of EA 1729 for future use as an effective and profitable aid in counterintelligence interrogations."¹²⁷ On the same day the ACSI requested that the CDC Commander revise regulation FM 30-17 to read in part:

. . . in no instance will drugs be used as an aid to interrogations in counterintelligence or security operations without prior permission of the Department of the Army. Requests to use drugs as an investigative aid will be forwarded through intelligence channels to the OACSI, DA, for approval. . . .

Medical research has established that information obtained through the use of these drugs is unreliable and invalid. . . .

It is considered that DA [Army] approval must be a prerequisite for use of such drugs because of the moral, legal, medical and political problems inherent in their use for intelligence purposes.¹²⁸

¹²¹ *Ibid.*, pp. 135, 137, 138.

¹²² Mehovsky Fact Sheet, 12/9/60.

¹²³ Memorandum from Leonard to Wheeler, 2/4/63.

¹²⁴ SGS memorandum to Wheeler through Hamlett, 2/5/63.

¹²⁵ *Ibid.*

¹²⁶ Maj. F. Barnett, memorandum for the record, 8/12/63.

¹²⁷ Yamaki memorandum for the record, 7/16/63.

¹²⁸ *Ibid.*

The subsequent adoption of this regulation marked the effective termination of field testing of LSD by the Army.

The official termination date of these testing programs is rather unclear, but a later ACSI memo indicates that it may have occurred in September of 1963. On the 19th of that month a meeting was held between Dr. Van Sims (Edgewood Arsenal), Major Clovis (Chemical Research Laboratory), and ACSI representatives (General Deholm and Colonel Schmidt). "As a result of this conference a determination was made to suspend the program and any further activity pending a more profitable and suitable use."¹²⁹

D. COOPERATION AND COMPETITION AMONG THE INTELLIGENCE COMMUNITY AGENCIES AND BETWEEN THESE AGENCIES AND OTHER INDIVIDUALS AND INSTITUTIONS

1. Relationships Among Agencies Within the Intelligence Community

Relationships among intelligence community agencies in this area varied considerably over time, ranging from full cooperation to intense and wasteful competition. The early period was marked by a high degree of cooperation among the agencies of the intelligence community. Although the military dominated research involving chemical and biological agents, the information developed was shared with the FBI and the CIA. But the spirit of cooperation did not continue. The failure by the military to share information apparently breached the spirit, if not the letter, of commands from above.

As noted above, the Army Assistant Chief of Staff for Intelligence was briefed on the proposed operational testing of LSD under Project THIRD CHANCE, and expressed concern that the project had not been coordinated with FBI and CIA. Despite this request, no coordination was achieved between the Army and either of these agencies. Had such cooperation been forthcoming, this project may have been evaluated in a different light.

The competition between the agencies in this area reached bizarre levels. A military officer told a CIA representative in confidence about the military's field testing of LSD in Europe under Project THIRD CHANCE, and the CIA promptly attempted to learn surreptitiously the nature and extent of the program. At roughly the same time Mr. Helms argued to the DDCI that the unwitting testing program should be continued, as it contributed to the CIA's capability in the area and thus allowed the CIA "to restrain others in the intelligence community (such as the Department of Defense) from pursuing operations."¹³⁰

The MKNAOMI program was also marked by a failure to share information. The Army Special Forces (the principal customer of the Special Operations Division at Fort Dietrick) and the CIA rather than attempting to coordinate their efforts promulgated different requirements which varied only slightly. This apparently resulted in some duplication of effort. In order to insure the security of CIA operations, the Agency would request materials from SOD for operational use without fully or accurately describing the operational requirements. This resulted in limitations on SOD's ability to assist the CIA.

¹²⁹ Undated ASCI memorandum, p. 2.

¹³⁰ Memorandum from the DDP to the DCI, 11/9/64, p. 2.

2. Relationships Between the Intelligence Community Agencies and Foreign Liaison Services

The subjects of the CIA's operational testing of chemical and biological agents abroad were generally being held for interrogation by foreign intelligence or security organizations. Although information about the use of drugs was generally withheld from these organizations, cooperation with them necessarily jeopardized the security of CIA interest in these materials. Cooperation also placed the American Government in a position of complicity in actions which violated the rights of the subjects, and which may have violated the laws of the country in which the experiments took place.

Cooperation between the intelligence agencies and organizations in foreign countries was not limited to relationships with the intelligence or internal security organizations. Some MKULTRA research was conducted abroad. While this is, in itself, not a questionable practice, it is important that such research abroad not be undertaken to evade American laws. That this was a possibility is suggested by an ARTICHOKE memorandum in which it is noted that working with the scientists of a foreign country "might be very advantageous" since that government "permitted certain activities which were not permitted by the United States government (i.e., experiments on anthrax, etc.)." ¹³¹

3. The Relationships Between the Intelligence Community Agencies and Other Agencies of the U.S. Government

Certain U.S. government agencies actively assisted the efforts of intelligence agencies in this area. One form of assistance was to provide "cover" for research contracts let by intelligence agencies, in order to disguise intelligence community interest in chemical and biological agents.

Other forms of assistance raise more serious questions. Although the CIA's project involving the surreptitious administration of LSD was conducted by Bureau of Narcotics personnel, there was no open connection between the Bureau personnel and the Agency. The Bureau was serving as a "cut-out" in order to make it difficult to trace Agency participation. The cut-out arrangement, however, reduced the CIA's ability to control the program. The Agency could not control the process by which subjects were selected and cultivated, and could not regulate follow-up after the testing. Moreover, as the CIA's Inspector General noted: "the handling of test subjects in the last analysis rests with the [Bureau of Narcotics] agent working alone. Suppression of knowledge of critical results from the top CIA management is an inherent risk in these operations." ¹³² The arrangement also made it impossible for the Agency to be certain that the decision to end the surreptitious administration of LSD would be honored by the Bureau personnel.

The arrangement with the Bureau of Narcotics was described as "informal." ¹³³ The informality of the arrangement compounded the problem is aggravated by the fact that the 40 Committee has had vir-

¹³¹ ARTICHOKE Memorandum, 6/13/52.

¹³² IG Report on MKULTRA, 1963, p. 14.

¹³³ *Ibid.* This was taken by one Agency official to mean that there would be no written contract and no formal mechanism for payment. (Elder, 12/18/75, p. 31.)

apparent unwillingness on the part of the Bureau's leadership to ask for details, and the CIA's hesitation in volunteering information. These problems raise serious questions of command and control within the Bureau.

4. Relationships Between the Intelligence Community Agencies and Other Institutions and Individuals, Public and Private

The Inspector General's 1963 Survey of MKULTRA noted that "the research and development" phase was conducted through standing arrangements with "specialists in universities, pharmaceutical houses, hospitals, state and federal institutions, and private research organizations" in a manner which concealed "from the institution the interests of the CIA." Only a few "key individuals" in each institution were "made witting of Agency sponsorship." The research and development phase was succeeded by a phase involving "physicians, toxicologists, and other specialists in mental, narcotics, and general hospitals and prisons, who are provided the products and findings of the basic research projects and proceed with intensive testing on human subjects."¹³⁴

According to the Inspector General, the MKULTRA testing programs were "conducted under accepted scientific procedures . . . where health permits, test subjects are voluntary participants in the programs."¹³⁵ This was clearly not true in the project involving the surreptitious administration of LSD, which was marked by a complete lack of screening, medical supervision, opportunity to observe, or medical or psychological follow-up.

The intelligence agencies allowed individual researchers to design their project. Experiments sponsored by these researchers (which included one where narcotics addicts were sent to Lexington, Kentucky, who were rewarded with the drug of their addiction in return for participation in experiments with LSD) call into question the decision by the agencies not to fix guidelines for the experiments.

The MKULTRA research and development program raises other questions, as well. It is not clear whether individuals in prisons, mental, narcotics and general hospitals can provide "informed consent" to participation in experiments such as these. There is doubt as to whether institutions should be unwitting of the ultimate sponsor of research being done in their facilities. The nature of the arrangements also made it impossible for the individuals who were not aware of the sponsor of the research to exercise any choice about their participation based on the sponsoring organization.

Although greater precautions are now being taken in research conducted on behalf of the intelligence community agencies, the dilemma of classification remains. These agencies obviously wished to conceal their interest in certain forms of research in order to avoid stimulating interest in the same areas by hostile governments. In some cases today contractors or researchers wish to conceal their connection with these agencies. Yet the fact of classification prevents open discussion and debate upon which scholarly work depends.

APPENDIX B

DOCUMENTS REFERRING TO DISCOVERY OF ADDITIONAL MKULTRA MATERIAL

22 June 1977

MEMORANDUM FOR: Deputy Director of Central Intelligence
 THROUGH : Deputy Director for Science and Technology
 SUBJECT : Request for Guidance on Handling
 Recently Located MKULTRA Material

1. (U/AIUO) This memorandum is to advise you that additional MKULTRA documents have been discovered and to obtain your approval for follow-on actions required. Paragraph 7 contains a recommended course of action.

2. (U/AIUO) As a result of John Marks FOIA request (F-76-374), all of the MKULTRA material in OTS possession was reviewed for possible release to him. Following that review, the OTS material in the Retired Records Center was searched. It was during that latter search that the subproject files were located among the retired records of the OTS Budget and Fiscal Section. These files were not discovered earlier as the earlier searches were limited to the examination of the active and retired records of those branches considered most likely to have generated or have had access to MKULTRA documents. Those branches included: Chemistry, Biological, Behavioral Activities, and Contracts Management. Because Dr. Gottlieb retrieved and destroyed all the MKULTRA documents he was able to locate, it is not surprising that the earlier search for MKULTRA documents, directed at areas where they were most likely to be found, was unsuccessful. The purpose of establishing the MKULTRA mechanism was to limit knowledge of the sensitive work being performed to those with an absolute need to know. If those precepts had been followed, the recently found B&F files should have contained only financial and administrative documents. (In retrospect, I realize that

Declassified by 15775
 date 2
 29 JUL 1977

SUBJECT: Request for Guidance on Handling Recently Located MKULTRA Material

a serious error was made in not having B&F files and other seemingly innocuous files searched earlier.) As it happens, most of the individual subproject folders contain project proposals and memoranda for the record, which in varying degrees, give a reasonably complete picture of the avenues of research funded through MKULTRA. For your information, the original memorandum setting up MKULTRA, signed by Mr. Dulles, is also among these documents. A copy of the memorandum is attached.

3. (U/AIUO) At this writing, it does not appear that there is anything in these newly located files that would indicate the MKULTRA activities were more extensive or more controversial than indicated by the Senate Select (Church) Committee Report. If anything, the reverse is true, i.e., most of the nearly 200 subprojects are innocuous. Thus, the overview of MKULTRA is essentially unchanged. With two exceptions, the present find fills in some of the missing details.

4. (U/AIUO) One of these exceptions is Subproject Number 45 which concerns an activity that should have been reported earlier. That project deals with the search for a knockout drug which was concomitant with, and a by-product of, cancer research at a major university. It is believed that an objective reading of that project would demonstrate the search for knockout materials and anesthetics were compatible activities. However, the research proposal stated that "chemical agents...will be subjected to clinical screening...on advanced cancer patients".

5. (C) Subproject Number 55 contains full details of CIA's contribution of \$375,000 to the ~~Building Fund~~ Building Fund. The Agency was then involved in drug research programs, many of which were being conducted by ~~whose facilities~~ whose facilities were inadequate. In order to facilitate the ongoing research programs, it was decided to expedite the building program by contributing to it through a mechanism that was also being used to fund some of the research projects.

SUBJECT: Request for Guidance on Handling Recently
located MKULTRA Material

The contribution could be controversial in that it was made through a mechanism making it appear to be a private donation. Private donations qualified for, and ~~received~~ received, an equal amount of Federal matching funds. A letter from the Office of General Counsel dated 21 February 1983 attesting to the legality of this funding is in the file.

6. (U//AUC) The Legislative Counsel has been made aware of the existence of these additional MKULTRA documents which are still under review and sanitization. The MARKS case is in litigation and we are committed to advise Mr. Marks of the existence of these files shortly, and to deliver the releasable material to his attorneys by 31 July. A letter from the Information and Privacy Staff to Mr. Marks' attorneys informing them of the existence of this material is in the coordination process and is scheduled to be mailed on 24 June.

7. (U//AUC) There are now two actions that should be taken:

a. Release appropriately sanitized material to Mr. Marks' attorneys as required by FOIA litigation.

b. Inform the Senate Select Committee of the existence of the recently located records prior to informing Mr. Marks' attorneys.

It is recommended that you approve of both of these actions.

8. (U//AUC) If additional details on the contents of this material are desired, the OIS officers most familiar with it are prepared to brief you at your convenience.

David S. Brandwein

David S. Brandwein
Director
Office of Technical Service

The Director of Central Intelligence

Washington, D.C. 20505

The Honorable Daniel K. Inouye, Chairman
Select Committee on Intelligence
United States Senate
Washington, D.C. 20510

Dear Mr. Chairman:

During the course of 1975 when the Senate Committee, chaired by Senator Church, was investigating intelligence activities, the CIA was asked to produce documentation on a program of experimentation with the effect of drugs. Under this project conducted from 1953 to 1964 and known as "MK-ULTRA," tests were conducted on American citizens in some cases without their knowledge. The CIA, after searching for such documentation, reported that most of the documents on this matter have been destroyed. I find it my duty to report to you now that our continuing search for drug related, as well as other documents, has uncovered certain papers which bear on this matter. Let me hasten to add that I am persuaded that there was no previous attempt to conceal this material in the original 1975 exploration. The material recently discovered was in the retired archives filed under financial accounts and only uncovered by using extraordinary and extensive search efforts. In this connection, incidentally, I have personally commended the employee whose diligence produced this find.

Because the new material now on hand is primarily of a financial nature, it does not present a complete picture of the field of drug experimentation activity but it does provide more detail than was previously available to us. For example, the following types of activities were undertaken:

- a. Possible additional cases of drugs being tested on American citizens, without their knowledge.
- b. Research was undertaken on surreptitious methods of administering drugs.
- c. Some of the persons chosen for experimentation were drug addicts or alcoholics.
- d. Research into the development of a knockout or "K" drug was performed in conjunction with being done to develop pain killers for advanced cancer patients, and tests on such patients were carried out.

e. There is a possibility of an improper payment to a private institution.

The drug related activities described in this newly located material began almost 25 years ago. I assure you they were discontinued over 10 years ago and do not take place today.

In keeping with the President's commitment to disclose any errors of the Intelligence Community which are uncovered, I would like to volunteer to testify before your Committee on the full details of this unfortunate series of events. I am in the process of reading the fairly voluminous material involved and do want to be certain that I have a complete picture when I talk with the Committee. I will be in touch with you next week to discuss when hearings might be scheduled at the earliest opportunity.

I regret having to bring this issue to your attention, but I know that it is essential to your oversight procedures that you be kept fully informed in a timely manner.

Yours sincerely,

A handwritten signature in dark ink, appearing to read "Stansfield Turner", written in a cursive style.

STANSFIELD TURNER

APPENDIX C

DOCUMENTS REFERRING TO SUBPROJECTS

date 6 JUN 1977DRAFT

date 6 JUN 1977PROPOSAL.

Objective: To study the possible synergistic action of drugs which may be appropriate for use in abolishing consciousness.

Situation: There is reason to believe that two or more drugs, used in combination, are more effective than single drugs. The combined effect of some drugs, such as combinations of barbiturates, are known. With other combinations, the degree of synergism is not known. If considerable synergism is found to exist, two possibilities must be considered: (1) that a particularly useful combination may be found, and (2) that a particular combination may be hazardous because of its effect on respiration or some other vital function. To minimize hazards, animal experiments should precede human experiments.

Proposal: Allocation of \$1000 for animal experiments, to be drawn on as needed. That experiments be conducted informally at ~~██████████~~ without a specific grant, and with appropriate cover.

B

date 6 JUN 1977PROPOSAL

Objective: To study methods for the administration of drugs without the knowledge of the patient. Preparation of a manual.

Method: A survey of methods which have been used by criminals for surreptitious administration of drugs. Analysis of the psychodynamics of situations of this nature.

Proposal: That \$1000 be allocated for this purpose, funds to be requested as needed.

May 26, 1953

Dear [redacted]:

After our telephone conversation this morning I went to [redacted] and opened an account - - regular checking - - in the amount of \$100.00 using the name [redacted].

It occurred to me that for sake of safety - - if, for example, anything should happen to me - it would simplify matters if I made this a joint account between [redacted] and [redacted]. Then, in case of my absence, illness or death you could recover the joint funds without any legal difficulties or monkey business.

The bank was a little sticky about opening an account in the absence of "references" from another bank, and also found it hard to understand how [redacted] got by all these years without a bank account. However, I offered to provide an excellent reference in a government official, a [redacted] who is the [redacted] at [redacted] and that seemed to placate the money-lenders. Thereafter, I communicated with [redacted] and he immediately wrote a reference for [redacted] on official stationery. [redacted] also kindly said he was well acquainted with [redacted] and was pleased to offer for him a similar recommendation.

If you think this is a good idea, I suggest you sign the Joint Account Agreement and the three signature cards enclosed and return them to me.

And now that the account is opened I suggest you have funds deposited via Cashier's check - - or any other way that seems easiest - - directly to [redacted] account.

I ordered checks printed with [redacted] name thereon and have also ordered stationery bearing [redacted] name. I considered this might facilitate payment of bills, etc., by mail.

What with suspicious banks, landlords, utility companies, etc., you will understand that creating the Jenkyl Hyde personality in the form of [redacted] is taking a little "doing".

See you Monday, the 8th.

Rgds,

MEMORANDUM FOR THE RECORD

SUBJECT: Project MKULTRA, Subproject 23

1. The scope of this project is intended to encompass all those activities now engaged in by the [REDACTED] in its own facilities under the direction of CD/TSS. At the present time the various projects at this facility ([REDACTED]) and [REDACTED] are being concluded and it is deemed desirable from the standpoint of security and efficiency to replace these projects with a single project more general in its approach. (B) (H)

2. The attached proposal from Dr. [REDACTED] indicates the extent of the investigations that his facilities will allow him to carry out on the materials developed in the three projects referred to in paragraph 1, as well as certain other materials of interest to Cd/TSS. Dr. [REDACTED] also serves as a general consultant to this division and provides cover and cut-out facilities to the Agency. (C)

3. The total cost of this project for a period of one year will not exceed \$42,700.00. (C)

4. Dr. [REDACTED] has been granted a Top Secret Clearance by the Agency and is fully capable of protecting the security of the Government's interest in such matters as this. (C)

Exec. Asst. Res. Dir.
Date: Dec 25 1954

[REDACTED] (A)
Research Director
Date: 25 Jan. 1955

Attachment: Proposal
[REDACTED]

The present investigation is concerned with chemical agents which are effective in modifying the behavior and function of the central nervous system.

- 1 - It is proposed to study a variety of known drugs in this pharmacological class that are in present day use and to synthesize new chemical agents or to modify existing ones as occasion may demand.
- 2 - The various chemical agents investigated or synthesized will be tested on animals to determine their acute and chronic toxicity. Their pharmacological effects will be studied by a variety of assay technics, such as blood pressure determinations, bronchial dilatation recordings, endocrine effects, etc. Complete animal facilities will be maintained for this purpose and pathologic study will be carried out on the affected organs when the animals are sacrificed.
- 3 - Preliminary clinical investigation will be carried out on the more promising chemical agents, and appropriate laboratory procedures will be performed, such as blood counts, urinalysis, etc. to determine the effectiveness and the side reactions of the drugs under investigation.
- 4 - Adequate reports will be submitted of the findings at quarterly intervals.
- 5 - Proposed budget:

Personnel

Synthetic organic chemist	\$7,500.00
Research medical associate	6,500.00
Pharmacological assistant	5,500.00
Chemical assistant	4,000.00
Histology technician	2,400.00
Clinical technician	3,600.00
Chemical consultant	<u>1,200.00</u>
Total salaries for personnel	\$30,700.00

Other Expenditures

Animals, animal maintenance & facilities	4,000.00
Chemical & laboratory supplies, expendable	4,000.00
Miscellaneous permanent equipment	2,000.00
Travel, medical meetings, etc.	<u>2,000.00</u>
Total other expenditures	<u>12,000.00</u>

TOTAL \$ 42,700.00

DRAFT ~~XXXXXXXXXX~~
8 October 1954

MEMORANDUM FOR THE RECORD

SUBJECT: Increase in the Scope of Subproject 23, Project MKULTRA

1. Due to a ^(C)considerable increase in the scope of the work undertaken by ~~XXXXXXXXXX~~ at the direction of TSS/CD under Subproject 23, Project MKULTRA, the \$42,700.00 sum originally obligated for this work is insufficient to cover the year's costs. It is therefore proposed to add \$15,000.00 to that already obligated under this Subproject.

2. The total cost of this Subproject for the period 28 January 1954 to 28 January 1955 will thus amount to \$57,700.00.

3. The increase in scope responsible for this proposal consists of the development and partial financing of two new sources of biologically active compounds of interest in the program TSS/CD is carrying out.

~~XXXXXXXXXX~~ (A)
Chemical Division, TSS

APPROVED FOR OBLIGATION
OF FUNDS:

APPROVED:

~~XXXXXXXXXX~~ (A)
Research Director

Henry J. ...
Chief, Chemical Division, TSS

Date: Oct 11-1954

Original Only.
