

25 August 1955

MEMORANDUM FOR: THE RECORD

SUBJECT: Authorization for Payment of Certain Expenses Under  
Project MKULTRA, Subproject 23

1. In order to carry on the work of the above Subproject, it was necessary to test the effects of certain chemical substances when administered to human beings. Certain of the anticipated effects involved mental functions which precluded the use of mental defectives for this particular study.

2. In view of these circumstances the project engineer, with verbal approval from his chief, authorized the contractor to pay the hospitals expenses of certain persons suffering from incurable cancer for the privilege of studying the effects of these chemicals during their terminal illnesses. The total funds expended in this fashion amounted to \$658.05 and full value was received.

3. It is requested that the Chief, TSS indicate his knowledge and approval of this particular expenditure for audit purposes.

21 December 1954

MEMORANDUM FOR: Director of Central Intelligence

SUBJECT : Project MKULTRA, Subproject 35

1. While the Director's statutory authority to expend funds for confidential purposes is not limited by law, we believe that a gift of Government funds as such would exceed the intent of the Congress in granting that power. However, where a gift is made for the express purpose of producing something of value to this Agency which cannot otherwise be obtained and there is a reasonable expectation that the value may be received, the gift may in effect be an expenditure for proper official purposes.

2. In Subproject 35, it is stated that the donation in question would achieve certain ends desired by TSS. There seems to be no question that those ends would be advantageous, so the main questions appear to be whether they could not be attained by more direct, normal methods, and, if not, whether the return is necessary and reasonable in relation to the donation.

3. We are in no position to review the requirements of TSS or to appraise the advantages that would result from this project. We do not comment, therefore, on the value received if the project results in the benefits foreseen. We feel we should comment on factors affecting the probability of achieving those ends. In a legal sense, there is little or no control. Once the funds are donated, the individual, his foundation, or the hospital could conceivably refuse to work for us or allow us the use of the facilities.

4. Practically, the control seems to be established as well as circumstances permit. Certainly, as long as the individual is alive and in his present position, we have every reason to expect his complete cooperation in the future as in the past, unless through some act or fault of our own he is alienated. Even in the event of his death or incapacity, there appears to be a reasonable

Downgraded to: ~~CONFIDENTIAL~~

by authority of: 187475

date: June 1977

EX-100000; CL BY 137475

Copy # 1 of 1 copy

chance of continuing the project. If these probabilities appear sufficient to obtain an adequate return for the expenditure, there can be no legal objection to this aspect of the project.

5. It should be noted that there are two circumstances which require consideration in a final determination. As stated in Section V, our contribution, by appearing to be from a private source, would increase the matching Government contribution by a similar amount which would not be the case if it were known that this was in fact a Government contribution also. Secondly, it is the stated policy of the hospital to charge the Government and commercial organizations 80 per cent overhead on research contracts, whereas nonprofit foundations pay only direct costs but no overhead. Because of the ostensible source, our projects will not be charged overhead. This could be construed as morally wrongful to the hospital, as normally we would pay the 80 per cent overhead charge for projects performed directly for us, but I believe this can be offset, at least to the amount of our donation, and perhaps by the further amount by which the other Government contributions are increased by our donation. In any case, if the project is a proper one and must be performed in this manner, security dictates these circumstances and they, therefore, do not present a legal obstacle as such.

6. We raised the question whether funds for the hospital construction could not be obtained from other normal charitable sources. It appeared that there was a strong possibility that the individual concerned could raise adequate funds from private resources, but it was the position of TSS that if this were the case we would not obtain the commitment from the individual and the degree of control which this project is designed to achieve.

MEMORANDUM FOR: Chief, DD/P/TSS

SUBJECT : Amendment to Subproject 35 of Project KULTRA

We have noted your memorandum of 6 April 1955 to the Director requesting an increase of \$250,000 for the TSS R&D budget for this Project. This request does not affect in any way the comments in my memorandum of 21 December 1954.

DRAFT

5 May 1955

A portion of the Research and Development Program of TSS/Chemical Division is devoted to the discovery of the following materials and methods:

1. Substances which will promote illogical thinking and impulsiveness to the point where the recipient would be discredited in public.
2. Substances which increase the efficiency of mentation and perception.
3. Materials which will prevent or counteract the intoxicating effect of alcohol.
4. Materials which will promote the intoxicating effect of alcohol.
5. Materials which will produce the signs and symptoms of recognized diseases in a reversible way so that they may be used for malingering, etc.
6. Materials which will render the induction of hypnosis easier or otherwise enhance its usefulness.
7. Substances which will enhance the ability of individuals to withstand privation, torture and coercion during interrogation and so-called "brain-washing".
8. Materials and physical methods which will produce amnesia for events preceding and during their use.
9. Physical methods of producing shock and confusion over extended periods of time and capable of surreptitious use.
10. Substances which produce physical disablement such as paralysis of the legs, acute anemia, etc.

Declassified to: [REDACTED]  
by authority of: 187475  
date: June 1977

187475; CL BY 187475

Declassified to: [REDACTED]  
by authority of: 187475  
date: June 1977

11. Substances which will produce "pure" euphoria with no subsequent let-down.

12. Substances which alter personality structure in such a way that the tendency of the recipient to become dependent upon another person is enhanced.

13. A material which will cause mental confusion of such a type that the individual under its influence will find it difficult to maintain a fabrication under questioning.

14. Substances which will lower the ambition and general working efficiency of men when administered in undetectable amounts.

15. Substances which promote weakness or distortion of the eyesight or hearing faculties, preferably without permanent effects.

16. A knockout pill which can surreptitiously be administered in drinks, food, cigarettes, as an aerosol, etc., which will be safe to use, provide a maximum of amnesia, and be suitable for use by agent types on an ad hoc basis.

17. A material which can be surreptitiously administered by the above routes and which in very small amounts will make it impossible for a man to perform any physical activity whatever.

The development of materials of this type follows the standard practice of such ethical drug houses as [REDACTED] - 12  
[REDACTED] It is a relatively routine procedure to develop a drug to the point of human testing. Ordinarily, the drug houses depend upon the services of private physicians for the final clinical testing. The physicians are willing to assume the responsibility of such tests in order to advance the science of medicine. It is difficult and sometimes impossible for TSS/CD to offer such an inducement with respect to its products. In practice, it has been possible to use outside cleared contractors for the preliminary phases of this work. However, that part which involves human testing at effective dose levels presents security problems which cannot be handled by the ordinary contractor.

Date: June 1977

EO 12812; CL BY 137475

-3-

B

The proposed facility [REDACTED] offers a unique opportunity for the secure handling of such clinical testing in addition to the many advantages outlined in the project proposal. The security problems mentioned above are eliminated by the fact that the responsibility for the testing will rest completely upon the physician and the hospital. [REDACTED] - B

[REDACTED] will allow SSS/CI personnel to supervise the work very closely to make sure that all tests are conducted according to the recognized practices and embody adequate safeguards.

## SUBPROJECT 35 OF PROJECT MKULTRA

1. Subproject 35 as approved by the DCI on 15 January 1955 contemplated a financial contribution of \$125,000 to the [REDACTED] to participate in the construction of a new research wing to cost \$3,000,000 exclusive of furnishings and equipment. Agency funds will be transmitted through the [REDACTED] as cut-out which will result in one-sixth of the space in the new research wing being made available for Agency-sponsored research involving covert biological and chemical techniques of warfare. - B

2. At that time (15 January 1955) [REDACTED] with CIA encouragement indicated a willingness to contribute \$500,000 to the construction fund. The building fund was to have been raised as follows: - B

|             |                                                                                          |     |
|-------------|------------------------------------------------------------------------------------------|-----|
| \$1,000,000 | - Contributed by [REDACTED]                                                              | - B |
| 250,000     | - Donation from [REDACTED] of which                                                      | - B |
|             | \$125,000 to be supplied by CIA                                                          |     |
| 1,250,000   | - Matching funds under Public Law 221 equal to the amount of the two above contributions |     |
| 500,000     | - [REDACTED]                                                                             | - B |
| \$3,000,000 | - TOTAL                                                                                  | - B |

3. Since it now appears that the expected contribution by [REDACTED] will not be forthcoming, permission is requested to increase the Agency's contribution by \$250,000 which will result in a financial situation as follows:

|             |                                                                                          |     |
|-------------|------------------------------------------------------------------------------------------|-----|
| \$1,000,000 | - Contributed by [REDACTED]                                                              | - B |
| 500,000     | - Donation from [REDACTED] including                                                     | - B |
|             | \$375,000 supplied by CIA                                                                |     |
| 1,500,000   | - Matching funds under Public Law 221 equal to the amount of the two above contributions |     |
| \$3,000,000 | - TOTAL                                                                                  |     |

4. The Agency's contribution would thus total \$375,000. This investment, together with the equal sum resulting from matched funds, is fully justified in the opinion of TSS for reasons which will be explained by [REDACTED] Chief, TSS, and Dr. Sidney Gottlieb, Chief, TSS/Chemical Division. The scope of subproject 35 has not changed since the Director originally approved a request by TSS for permission to spend \$125,000 of available - C

*Summary of project circulated to members of JRC at meeting on 11 May 1955*

<sup>H</sup>  
 Funds for this purpose through the controls and procedures established for MICULTRA. At the time subproject 35 was set up within the scope of the TSS R&D program, security considerations and cover arrangements were carefully reviewed, and the Office of General Counsel assisted in legal determinations. With the exception of funding arrangements, no changes in the program have since been made.

<sup>H</sup>  
 5. Funds to cover the previously approved sum of \$125,000 are available within the TSS ~~budget~~ budget for FY 55 and have been set aside. The TSS budget, however, lacks funds with which to cover the supplemental sum of \$250,000, and it is requested that the TSS ~~budget~~ budget be increased by this amount. Supplementary funds available for subproject 35 can definitely be obligated by the end of FY 55.

AMENDMENT TO SUBPROJECT 35, PROJECT MKULTRA

For the Purpose of Establishing a Cover Organization for Highly Sensitive Projects in the Field of Biological, Chemical and Radiological Warfare

I. Background of Subproject 35.

In January 1955 approval was given by the DCI to Subproject 35 of Project MKULTRA. The documents which lead to this approval (including comments of the OGC) are attached herewith as Tabs 2, A and 3.

Project MKULTRA is the framework of procedures and controls under which research projects in certain highly sensitive fields are carried out by TSS. A description of the background of Project MKULTRA may be found on page 1 of Tab A.

Subproject 35 establishes cover under which the Chemical Division of DD/P/TSS would conduct certain sensitive projects in the fields of biological and chemical warfare and consists of a proposed arrangement whereby the Agency covertly contributes funds to assist the [REDACTED] - B  
[REDACTED] in the construction of a new research wing. Contribution of these funds is to be made through the [REDACTED] - B  
[REDACTED] as cut-out so that the [REDACTED] would remain - B  
unwitting of Agency participation in the building program. Projects would later be carried out by the Chemical Division using the facilities of the new research wing, and Agency employees would be able to participate in the work without the University or the Hospital authorities being aware of Agency interest. Subproject 35 contemplated the contribution of Agency funds to assist in the construction of facilities. Future research work would be carried out through the [REDACTED] as cut-out and would be - B  
separately funded under existing procedures and controls.

[REDACTED], and the background of - B  
[REDACTED] are described on page 2 of Tab A. On the same page there will be found a further description of the [REDACTED] - B  
[REDACTED]

II. Building Fund.

The University will require \$3,000,000 for the six-story addition to the hospital exclusive of the cost of land, heating and power supply which are being provided by the University. Under Public Law 221, Subappropriation

Exempt Copy # [REDACTED]

Authority of: 157475

Date: June 1977

DD FORM 137-475

663, dated 26 August 1954, funds are available to match funds raised for this purpose by the University.

When Subproject 35 was first prepared, it was hoped and expected that the funds required would be provided as follows: The University has allocated \$1,000,000 to this project and will assume upkeep and staffing obligations.

C [redacted] agreed that if the Agency would provide [redacted] - B with a grant of \$125,000, the Fund would match this amount and make a total donation of \$250,000 to the University Building Fund. At that time, discussions with [redacted] - B

[redacted] indicated that [redacted] would contribute \$500,000 to the building project on the basis that radiological research would be conducted in the new wing and that the construction of the new facilities was of interest to that Agency. In summary, the financial situation was to have been as follows:

\$1,000,000 - [redacted] - B  
 250,000 - Donation from [redacted] (of which - B  
                   \$125,000 was supplied by CIA)  
 1,250,000 - Matched Funds under Public Law 221  
             500,000 - [redacted] - B  
 \$3,000,000 - TOTAL

It was recognized that the Federal contribution of \$1,250,000 under Public Law 221 would be seemingly inflated by reason of the inclusion of the CIA contribution in that of [redacted] B. It was felt that the value to the Agency was such that this inflation of the Federal contribution was more than justified by the importance of the over-all project and that furthermore, the inclusion of the CIA contribution in that of [redacted] was the best means of maintaining security.

### III. [redacted] - B

The original informal commitment on the part of [redacted] B was first obtained through verbal discussions with [redacted] C, which were followed up by an exchange of correspondence between the DCI and [redacted] C. Unfortunately at that time [redacted] was fully occupied with the controversy concerning the [redacted] and continued contact with [redacted] - C. [redacted] subordinates resulted in a decision that [redacted] could not or would not contribute to the Building Fund, but would be willing to support an annual research program amounting to \$50,000 to \$75,000. It is not

known whether this change in policy was suggested to [REDACTED] or whether it originated with him. Be that as it may, when the change in policy became apparent, it was evident that additional funds would be required to complete the hospital construction. - C

#### IV. Suggested Funding.

It is now suggested that the \$3,000,000 required for the hospital wing be provided as follows:

\$1,000,000 - [REDACTED] - B  
 500,000 - Donation from [REDACTED] (including [REDACTED] - B  
                   \$375,000 supplied by CIA)  
 1,500,000 - Matched Funds from Public Law 221  
\$3,000,000 - TOTAL - B

The donation from [REDACTED] would thus consist of the original \$125,000 to be supplied by CIA plus the sum of \$125,000 to be provided by the Fund and a supplemental CIA contribution of \$250,000. Originally Subproject 35 requested permission to make a contribution of \$125,000 to the building fund and approval was given. This approval is enclosed herewith as Tab 2. The purpose of this amendment to Subproject 35 is to request permission to contribute an additional \$250,000 to the building construction fund through [REDACTED]. It should be noted that the total Government contribution to the hospital fund still remains unchanged at \$1,875,000. The increase in the size of the contribution by the Fund is not out of keeping with other operations of [REDACTED] and will not arouse undue comment because of its magnitude. The originally approved contribution has not as yet been transmitted to [REDACTED] and neither the original contribution nor the supplement would be paid to [REDACTED] until funds adequate to complete the project are made available. This condition was specified by the DCI in approving the original contribution. - B

#### V. Source of CIA Funds.

Funds to cover the initially approved sum of \$125,000 are available and have been segregated for this purpose within the TSS FY 1955 Budget for Research and Development. Insufficient funds remain in the TSS budget to cover the supplementary sum of \$250,000, and it is therefore requested that the TSS budget be increased by this amount and that the increase be made available to Subproject 35 of Project MKULTRA.

Forwarded to [REDACTED]  
 by [REDACTED] of [REDACTED]  
 on [REDACTED]  
 [REDACTED]

Copy # 1 of 1 copy

# VI. Comments by the Office of General Counsel.

Tab 3 is a memorandum from the General Counsel to the DCI dated 21 December 1954, commenting on Subproject 35, and stating in part that there are no fundamental legal objections if the probable benefits are considered a fair return for this expenditure. The amendment to the Subproject contemplates only an increase in funds and in no way changes any other aspect of the project. The project has been referred back to the OGC even though no change in its structure is contemplated, and Tab 4 contains his comments.

# VII. Justification.

The advantages and benefits accruing to the Agency outlined in Tab A are felt by TSS to provide adequate and complete justification for the expenditure of the additional sum herein requested which brings the total CIA contribution to \$375,000. The most important of these advantages and benefits may be summarized as follows: (Fuller explanations may be found in Tab A).

- a. One-sixth of the total space in the new hospital wing will be available to the Chemical Division of TSS, thereby providing laboratory and office space, technical assistants; equipment and experimental animals.
- b. Agency sponsorship of sensitive research projects will be completely deniable.
- c. Full professional cover will be provided for up to three biochemical employees of the Chemical Division.
- d. Human patients and volunteers for experimental use will be available under controlled clinical conditions within the full supervision of [REDACTED] - B

Subproject 35 was originally conceived in October and November of 1954, and the ensuing six months have indicated that increasing emphasis and importance are being placed on the Chemical Division's work in this field. The facilities of the hospital and the ability to conduct controlled experiments under safe clinical conditions using materials with which any Agency connection must be completely deniable will augment and complement other programs recently taken over by TSS, such as [REDACTED] - H

Declassified to: ~~CONFIDENTIAL~~  
 Authority of: 187475  
 Date: June 1977

Copy # 1 of 1 copy

DECLASS: 05 BY 137475

It was originally thought that at least 18 months would elapse after the building funds had been raised before the facilities would be finished and could be occupied by TSS. This lengthy delay has now been overcome.

When [REDACTED] has raised the \$500,000 which his Fund will ostensibly contribute, he will then be allowed to use existing space in the present hospital in order that he may build up the organization which will later occupy the new wing. This means that TSS will be able to begin to take advantage of this cover situation within a matter of months instead of waiting for a year and a half.

#### VIII. Security.

Security matters and details are being co-ordinated with the TSS Liaison and Security Officer. Security of transmittal of the funds and cover arrangements are described in Tab A and remain unchanged.

#### IX. Agreement with [REDACTED] < C

The agreement with [REDACTED] is described in Tab A, and the extent of his co-operation and the control over his actions remain unchanged.

#### X. Resultant Financial Saving.

The total contribution of \$375,000 by CIA will result in an additional \$375,000 in matching funds provided under Public Law 221. It is felt that the expenditure of these total funds is justified by the importance of the programs which will be pursued at the new facility. Even though the CIA contribution is increased under this amended project, the total of Federal funds remains unchanged. The use of this facility will allow work to proceed under conditions of cover and security which would be impossible to obtain elsewhere without an expenditure of equivalent or greater funds. In addition, by funding individual projects for this facility through the

B- [REDACTED] no charge will be incurred for overhead expense. If research projects [REDACTED] are openly sponsored by the U. S. Government, it is customary to pay an overhead rate equivalent to 80% of salaries. However, if a non-profit fund, such as [REDACTED] sponsors research, the funds granted for the work are customarily used only to pay for salaries, equipment and supplies, but not overhead. The Agency thus buys considerably more research through [REDACTED] than would be the case if no cut-out were used.

Documented to: [REDACTED]

## SUBPROJECT 35 - PROJECT MKULTRA

For the purpose of establishing a cover organization for highly sensitive projects in the field of Cover Biological, Chemical and Radiological Warfare

I. Background of Project MKULTRA.

In 1953 the DCI approved Project MKULTRA which established procedures and controls under which research projects in certain highly sensitive fields could be carried out by TSS without the necessity of signing the usual contracts. The approved procedures apply over-all Research and Development budget, and no additional funds are required. Controls established in the Project Review Committee approval of the Research and Development program (other than the signing of a contract) remain unchanged, and special provisions for audit are included. All files are retained by TSS.

These procedures and controls were approved since it is highly undesirable from a policy and security point of view that contracts be signed indicating Agency or Government interest in this field of endeavor. In a great many instances the work must be conducted by individuals who are not and should not be aware of Agency interest. In other cases the individuals involved are unwilling to have their names on a contract which remains out of their control in our files. Experience has shown that qualified, competent individuals in the field of physiological, psychiatric and other biological sciences are very reluctant to enter into signed agreements of any sort which would connect them with this activity since such connection might seriously jeopardize their professional reputations.

When Project MKULTRA was approved, it was not contemplated that it would be used for the establishment of cover. Over forty individual research and development projects have been established under this framework and have been carried out extremely successfully, both from technical and administrative points of view. The experience gained in handling these projects has emphasized that establishment of better cover both for the projects and for associated Agency scientists is of utmost importance. Subproject 35 would establish such cover.

DECLASSIFIED BY 137475

## II. Background of the [REDACTED]

The [REDACTED] was incorporated in [REDACTED] - B  
[REDACTED]. It has a Board of Directors of six - B  
members, one of whom is [REDACTED] who acts as Executive - C  
Director of the Fund. [REDACTED] it has solicited funds from various - B  
individuals to finance a program of basic research in the chemotherapy  
of cancer, asthma, hypertension, psychosomatic disorders and other  
chronic diseases. Since 1951 [REDACTED] has co-operated with the - B  
Chemical Division of TSS and acted smoothly and efficiently, both as  
a cut-out for dealing with contractors in the fields of covert chemical  
and biological warfare, and as a prime contractor for certain areas of  
biological research. Projects presently being handled for the Agency  
by the Fund are administered under the controls and procedures  
previously approved for MKULTRA.

## III. Background of [REDACTED]

[REDACTED] is internationally known as a [REDACTED] - C  
in the field of [REDACTED] research and is [REDACTED] - C  
[REDACTED]. In the past he has been associated in  
a research capacity with both the [REDACTED] - B  
[REDACTED]. During the war [REDACTED] served as a [REDACTED] - C  
in the Bureau of Medicine and Surgery in the Navy. Since then he has  
maintained a consulting relationship to the Navy medical research pro-  
gram. [REDACTED] is TOP SECRET cleared and witting of Agency - C  
sponsorship of the programs carried out by the Fund as are two other  
members of the Fund's Board of Directors.

## IV. [REDACTED] Fund. - B

[REDACTED] has been actively engaged in a campaign to raise funds - CAC  
for the purpose of erecting a new clinical research wing on the existing  
[REDACTED]. The research wing will consist of a - B  
building six stories high, 320 feet long and 50 feet wide. Two-thirds  
of the space will be research laboratories and offices while 100  
research beds will occupy the remainder. [REDACTED] partici- - C  
pation in the fund-raising campaign outlined below will result in his  
having control of one-sixth of the total space in addition to the base-

ment and general out-patient facilities. In this effort, [REDACTED] has secured the enthusiastic support of the medical faculty and the officers of the University who have carried the preliminary arrangements forward to the maximum extent of their resources. - C

#### V. Financial Situation.

The University will require about \$3,000,000 for the [REDACTED] story addition. This sum is exclusive of the cost of land and the heating and power supply, which are already available at the site. At the present time under Public Law 221, funds are available to match funds raised by the University. The University has allocated \$1,000,000 to this project and will assume upkeep and staffing obligations. [REDACTED] has agreed that if CIA will provide [REDACTED] a grant of \$125,000, [REDACTED] will match this amount and make a total donation of \$250,000 to the University Building Fund. This Agency's contribution will be made under the condition that it will be refunded if construction does not take place. - C - B

TSS has discussed this situation with [REDACTED] and has encouraged [REDACTED] to donate \$500,000 to the building project on the basis that [REDACTED] will be conducted in the new wing. [REDACTED] though aware of our interest in the building, is unwitting of our specific fields of research and individual projects. In summary, the financial situation would be as follows: - B

|                      |                                   |     |
|----------------------|-----------------------------------|-----|
| \$1,000,000 -        | [REDACTED]                        | - B |
| 250,000 -            | Donation from [REDACTED]          |     |
|                      | (\$125,000 supplied by CIA)       |     |
| 1,250,000 -          | Matched funds from Public Law 221 |     |
| 500,000 -            | [REDACTED]                        | - B |
| <u>\$3,000,000 -</u> | <u>TOTAL</u>                      |     |

Although it is recognized that the Federal contribution of \$1,250,000 under P. L. 221 is seemingly inflated by reason of the inclusion of the CIA contribution in that of [REDACTED], actually the value to the CIA is \$250,000 and not just \$125,000, the amount of CIA's contribution; furthermore the inclusion of the CIA contribution in that of [REDACTED] is the best method of maintaining security. - B

VI. Difficulties Faced by TSS.

It has been generally recognized for some time that the external research activities of the Chemical Division of TSS in the field of covert biological, chemical and radiological warfare are sorely in need of proper cover. Although Project MKULTRA provides excellent administrative and financial cover for projects, it does not afford cover for scientific or technical personnel. MKULTRA has been used for dealing through [redacted] as a cut-out and for working directly with individuals or private companies. The use of [redacted] in the future will be increasingly limited due to [redacted] - B - 12

- (a) The increasing number of people who, albeit properly cleared, are aware of the Agency connection with [redacted] - B
- (b) The feeling by [redacted] that the Agency employees contacting him (Drs. Gottlieb, [redacted] etc.) have no cover of any sort and consequently expose him to unnecessary and highly undesirable personal risk; and - C
- (c) The widespread intra-Agency awareness of the nature of the relationship between the Fund and the Agency.

Another serious problem faced by TSS/CD as a result of lack of suitable cover is the difficulty in planning careers for technical and scientific personnel in the biological field. A long-range career concept of activities in this field inevitably includes proper cover for the individual concerned. The availability of research facilities at [redacted] will offer an excellent opportunity to solve many of the above problems, and [redacted] is willing and able to make any reasonable arrangements to suit our needs. Up to three Chemical Division employees can be integrated into [redacted] program for work in the new hospital wing on the Agency's research projects. Although career planning was not a consideration when planning the procedures and controls established by Project MKULTRA, nevertheless this particular subproject, in addition to its primary objective, will be of very great secondary help - B - C

in simplifying and eliminating many of the very awkward and dangerous conditions facing certain Chemical Division employees.

#### VII. Advantages and Benefits Accruing to TSS.

The contemplated arrangements will result in many advantages and benefits, including the following:

- (a) One-sixth of the total space in the new research building is to be available to [REDACTED] and in turn, will be available to the Chemical Division of TSS. This will provide laboratory and office space, technical assistants, equipment and experimental animals for use of Chemical Division personnel in connection with specific future projects. - C
- (b) The cost of Chemical Division projects which are to be carried out under this cover will be covered by funds made available through Project MKULTRA, and projects will be subject to the procedures and controls established for MKULTRA. The funds will be passed through [REDACTED] - B as has been done in the past. [REDACTED] in turn will either pay expenses directly or transfer the money to the University for this purpose. Each project will be individually funded based on its particular budget, and there will be no other continuing or recurring charges for items such as space, facilities, etc.
- (c) The Agency's sponsorship of sensitive research projects would be completely deniable since no connection would exist between the University and the Agency.
- (d) Excellent professional cover would be provided for up to three bio-chemical employees of the Chemical Division of TSS. This would allow open attendance at scientific meetings, the advancement of personal standing in the scientific world, and as such, would constitute a major efficiency and
